CHIEF COMMISSIONER

Nº 22

COMPILED BY **W. PEARCE**
Calgary 20th April, 1918.

Showing as units each Municipality, Local Improvement Districts and area which will eventually become Local Improvement Districts and afterwards Municipalities.

Drawn to scale: The Cultivated area in acres, also Stock area in acres, Horses, Cattle, Sheep and Pigs with the area apportioned thereof.

LEGEND

Area under crop in acres, plotted to scale with area shown in acres.	15310
Acres to scale required for pasturage, allowing 6 ac. for each Horse, 4 acres for each head of Cattle and 1 acre for each Sheep and Pig. The upper figures show the Nº Horses, next Cattle, next Sheep and bottom Pigs.	350 436 6135 250
4 —·—·—	*Municipalities or Local Improvement District where organized; where unorganized will be.*
▬ 2124	*Population other than that in Cities, Towns and Villages. Note: Non-urban in this differs from what is classed as rural in the majority of the other graphs issued by this office. The said rural is non-urban plus 1% of Cities, 8% of the Towns and 20% of the Villages, located within said units.*

Calgary 6th May 1918.

Dear Sir:-

Attached hereto units please find two graphs No 22 and 23. They can readily be pasted together thus making one for the entire province of Alberta.

In each unit the area under cultivation is shown to scale. Also that required for stock or the basis specified. In reference to the grazing within said units it would be well to bear in mind that probably a very small percentage of the land grazed over is owned by the proprietors of the stock grazing thereon, being railway land grants or owned by others, many no doubt not residing in the vicinity or even in the province.

It is trusted they will prove both interesting and of value. For the purpose of showing to what extent the lands in the various units are now utilized, it is hoped the schemes adopted is a good one. If you can suggest a better one the undersigned would take it as a personal favor if you would do so. The object in preparing these graph is to present information in such a shape that it can be readily grasped. For that reason, many good ideas will no doubt present themselves to others than those engaged in the preparation thereof.

It is hoped that by reference to the legend anyone can readily understand what the compiler desired to show and he trusts he has made a fair approach towards the object sought. It is anticipated that the information thus presented will prove of very considerable aid in any further schemes of settlement, particularly in the matter of filling up the areas now sparsely or partially occupied.

William Pearce
